

Due: Friday, 6 February 2009

Collaboration: If you collaborated with someone during lab to create a spreadsheet, please acknowledge that person. Each of you should submit your printout.

Submission: Turn in a printed or neatly written copy of your work at the beginning of class.

1. Turn in a printed copy of the spreadsheet you made for “Example 2” of the Spreadsheets lab (Wednesday 28 Jan).

2. Convert each of the following positive integers (in binary notation) to the equivalent base ten (decimal) representation. Show your work

(a) 010110

(b) 101111

3. Convert each of the following integers (in decimal notation) to the equivalent binary representation. Show your work.

(a) 17

(b) 72

4. Perform the following addition problem, showing your work and giving the result in binary notation.

$$\begin{array}{r} 1011011 \\ + 0101101 \\ \hline \end{array}$$

5. Perform the following multiplication problem, showing your work and giving the result in binary notation.

$$\begin{array}{r} 011 \\ * 101 \\ \hline \end{array}$$
