

Context

- A recent computing technology topic is discussed.
- Sufficient technological background clarifies the relevant social issues.

Thesis

- A clear social/ethical question, proposition, rule, or policy is stated.
- The thesis is neither factual nor obvious.

Stakeholders

- Stakeholders in the issue are identified.
- Stakeholder interests are presented.

Analysis

- Impacts of the technology on stakeholders are offered.
- Relevant duties, rights, consequences, etc. are examined.

Conclusion

- Analysis supports the position taken.
- Arguments rely on evidence and theory, rather than opinion.

Organization

- Paragraphs have unity and clear topic sentences.
- Paragraphs exhibit logical internal cohesion.
- There are clear transitions from one paragraph to another.

References

- Factual claims are supported.
- Adequate bibliographical information is provided.
- References are appropriate to the scope and audience of paper.

Usage and Style

- The paper uses correct grammar, syntax, and spelling.
- There are no sentence fragments or run-on sentences.
- Passive voice, broad reference, and nominalization are avoided.
